If more than one search is submitted, please prioritize searches in order of need.

\*\*\*\*\*

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Electronic Auctions

Inventors (please provide full names): ALAILA et al

Earliest Priority Filing Date: 02/19/1999

*\*For Sequence Searches Only\* Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.*

This invention pertains to electronic auctions where goods or merchandise is auctioned in lots and the closing time of successive lots (first lot, second lot etc.) is set, then the closing time of the second lot is extended based on any extension of the closing time of the first lot.

If you do not find any meaningful references for the above concept please broaden the concept to find any reference including auction of goods or merchandise in lots and closing time or period or duration in which the auction is open for a lot.

**MARKET-BASED ALLOCATION MECHANISMS FOR LOT-SIZE DECISION MAKERS AND ELECTRIC POWER UTILITIES**

Author: CHEN, CHENG-KANG

The objective of this dissertation is to investigate how lot -size decision makers and electric power utilities determine critical economic quantities (e.g., the order quantities for the lot -size decision makers and the transmission service charges for the electric power utilities). A primary motivation of this study is to improve the economic efficiency (often measured in terms of cost saving) for lot -size decision makers and electric power utilities.

For lot -size decision makers, we extend the traditional economic order quantity (EOQ) model by considering various aspects of model environments such as pricing policies. First, we investigate the inventory
